

Spector Pro®

Award-Winning Internet Monitoring and Surveillance Software

Spector Pro is the world's best selling software for monitoring and recording every detail of PC and Internet activity - in your office, school or home. Spector Pro records all emails, chats, instant messages, web sites visited, program activity and more... plus, an advanced surveillance screen snapshot recorder lets you SEE what they do, in the EXACT order they do it, step by step.

Key Benefits

- Detect employee abuse of company PCs and Internet access
- Protect children from online predators and inappropriate Internet content
- Monitor family computers connected via a simple home network
- Monitor classroom computers used by students and/or faculty

Features at a Glance

- Records everything they do on the PC and Internet including: emails, chats, instant messages, web site visits, programs used and much more...
- Captures screen snapshots of all PC and Internet activity like a video surveillance camera
- Provides Top 10 reports of frequent email, chat, instant message and web site activity
- Warns of potential danger when any word or phrase on your watch list is detected
- Blocks all Internet activity or any specific web site or person you don't want them chatting with
- Monitors small groups of PCs over a simple home or small business network

Silent, Comprehensive & Effective Monitoring

Spector Pro includes more than a dozen tools that silently capture all PC and Internet activity, saving the recordings to a hidden location on the computer hard drive.

Spector Pro will automatically record:

-  Screen Snapshots
-  Chats and Instant Messages
-  Keystrokes Typed
-  MySpace + Facebook Activity
-  Online Searches
-  Web Sites Visited
-  Emails Sent and Received
-  Program Activity
-  Files Uploaded/Downloaded
-  User Activity

and more...

Watch History Unfold

Spector Pro continually takes snapshots of the computer screen as frequently as once a second, or screen snapshots may be taken based on user activity, such as mouse clicks, page scrolling or new web page visits. This gives you an extremely accurate and visual view of what the person

you are monitoring has been doing on the computer. Reviewing the recordings is simple with easy-to-use, VCR-like controls.

Detect Danger

Spector Pro warns you whenever it detects inappropriate behavior. Through the use of keywords and phrases, Spector Pro is always "on alert", sending immediate and detailed reports of when, where and how detected keywords were used - directly to your email Inbox or cell phone.

"Spector Pro has been so effective at reducing personal time spent on the computer that I expect an annual cost savings of \$220,000."

Daniel Anderson
Northern Arizona Orthopedics
Flagstaff, Arizona

Figure 1. Snapshot recording allows you to see not only what they do, but the EXACT order in which they do it, step-by-step. Screen snapshot playback is like watching a video surveillance tape of their online and PC activity.

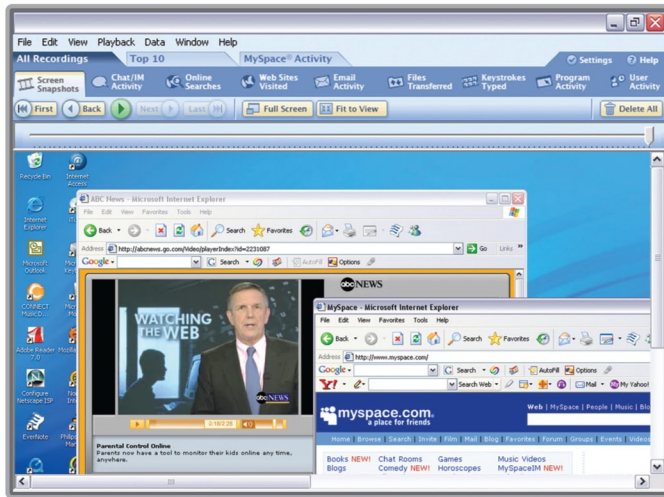

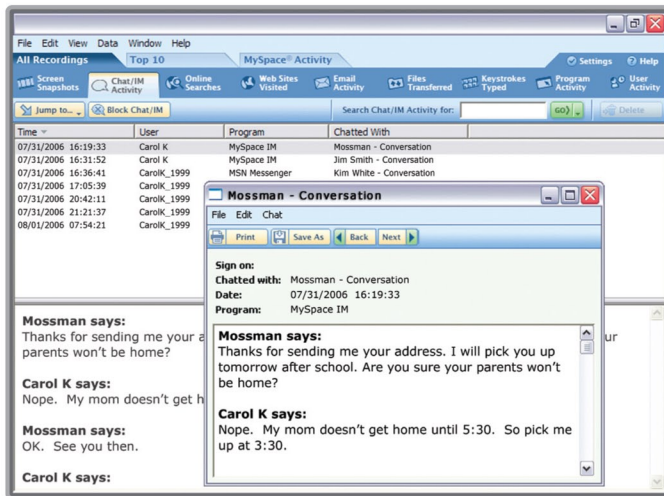

Figure 2. Chat and instant message conversations are recorded by Spector Pro. Plus, powerful Chat Blocking allows you to prevent specific people from any further chatting or Instant Messaging with your employee or child.

System Requirements

For Computer Being Recorded

- All versions of Windows Vista™, Windows® XP Home Edition or Professional or Windows 2000

“Since the installation of Spector Pro on a number of our computers in the office, Internet abuse and inter-company email gossip has nearly been eliminated.”

Joseph Danenza
Alexander Samuel & Co., Solicitors
London, United Kingdom

“Within 36 hours of using Spector, I had enough evidence. The teacher that was having a sexual relationship with our daughter was arrested, sentenced and will have his photo and address listed on the state sex offender web site. None of this would have been possible without the evidence obtained using Spector.”

Bob Watkins
Tennessee

Block the Bad Guys

Now that you KNOW which web sites they are visiting, the people they are chatting with and what they are chatting about... how do you handle the bad guys? With Spector Pro it's easy — just click BLOCK! With just one click you quickly block access to web sites you determine to be inappropriate and people you don't want them chatting with. You can even block complete access to the Internet all day long... or on a schedule you create!

Top 10 Summary Reports

Spector Pro will automatically sift through your recordings to create Top 10 Reports of the most important PC and

Internet activities. See the Top 10 web sites they visit, what they search for on Google, who they email the most, people they most often chat with, etc...

Secure & Tamper Proof

Stealth Technology

Stealth technology ensures that Spector Pro cannot be detected or tampered with. Spector Pro will not appear in the Windows System Tray, on the Desktop, in the Task Manager or Add/Remove Programs Menu.

Password & HotKey Protection

Spector Pro is guarded from unauthorized access through the use of dedicated HotKeys and a password.
