

# Spector Pro<sup>®</sup> | mac

## Award-Winning Internet Monitoring and Surveillance Software

Spector Pro is the world's best selling software for monitoring and recording every detail of computer and Internet activity - in your office, school or home. Spector Pro automatically records emails, chats, instant messages, web sites visited, keystrokes typed and more... plus, an advanced surveillance screen snapshot recorder lets you SEE what they do, in the EXACT order they do it, step by step.

### Key Benefits

- Detect employee abuse of company Macs and Internet access
- Protect children from online predators and inappropriate Internet content
- Monitor family computers connected via a home network from another Mac or PC
- Monitor classroom computers used by students and/or faculty

### Features at a Glance

- Records everything they do on the computer and Internet including: emails, chats, instant messages, web site visits, keystrokes typed and more...
- Captures screen snapshots of all computer and Internet activity like a video surveillance camera
- Monitors small groups of Macs over a home or local network

### Silent, Comprehensive & Effective Monitoring

Designed specifically for Mac OS X, Spector Pro includes a suite of tools that silently captures all computer and Internet activity, saving the recordings to a hidden location on the computer hard drive.

#### Spector Pro will automatically record:

-  Screen Snapshots
-  Chats and Instant Messages
-  Keystrokes Typed
-  Web Sites Visited
-  Emails Sent and Received
-  User Activity

### Watch History Unfold

Spector Pro continually takes snapshots of the computer screen as frequently as once every five seconds, or screen snapshots may be taken based on user activity, such as clicking the mouse, visiting a new web page or launching a program. This gives you an extremely accurate and visual view of what the person you are monitoring has been doing on the computer. Reviewing the recordings is simple with easy-to-use, video-style controls.

### Be Your Own Postal Inspector

Spector Pro automatically saves a copy of the emails they send or receive. With a click of a button, you can quickly review all email activity and even sort by Sender, Recipient, Subject or Time/Date. Spector Pro displays the complete contents of the email and even provides the option of recording email attachments.

*"Spector Pro has been so effective at reducing personal time spent on the computer that I expect an annual cost savings of \$220,000."*

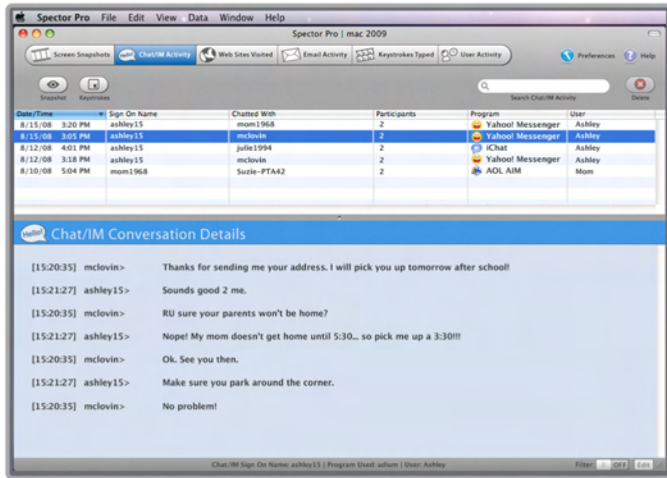

Daniel Anderson  
Northern Arizona Orthopedics  
Flagstaff, Arizona

**Figure 1.** Snapshot recording allows you to see not only what they do, but the EXACT order in which they do it, step-by-step. Screen snapshot playback is like watching a video surveillance tape of their online and computer activity.

**Figure 2.** Chat and instant message conversations are recorded by Spector Pro. Now you will know exactly who they are chatting with and be able to review every detail of their online conversation.

## System Requirements

### For Computer Being Recorded

- Mac OS X 10.4 or later (Mac OS X 10.5 recommended)
- Intel or Power PC

*"Since the installation of Spector Pro on a number of our computers in the office, Internet abuse and inter-company email gossip has nearly been eliminated."*

Joseph Danenza  
Alexander Samuel & Co., Solicitors  
London, United Kingdom

*"Within 36 hours of using Spector, I had enough evidence. The teacher that was having a sexual relationship with our daughter was arrested, sentenced and will have his photo and address listed on the state sex offender web site. None of this would have been possible without the evidence obtained using Spector."*

Bob Watkins  
Tennessee

## Give Your Mac A Chat Scan

As a parent or employer it is important that you know what is being communicated through chat and instant messages... and to whom. With the Chat/Instant Message recorder built into Spector Pro, both sides of chat conversations and instant messages are automatically recorded and saved for your later review.

## Rewind Their Web Surfing

Spector Pro continually monitors every web page that is accessed on the computer. Now you can see not only where they go online, but how frequently they visit the web site.

## Capture Every Keystroke

See exactly what they type on the computer and the Internet... including passwords!

## Secure & Tamper Proof

### Stealth Technology

Stealth technology ensures that Spector Pro cannot be detected or tampered with. Spector Pro will not appear in the Dock, Desktop, Applications Folder, Force Quit Applications menu or Menu Bar.

### Password & HotKey Protection

Spector Pro is guarded from unauthorized access through the use of a secret HotKey combination and a password.
